SAMI FARHAT

Junior Software Engineer | Full-Stack & Mobile Development

Beirut, Lebanon | +961 71 500 323 | sami.farhat.dev@gmail.com | Portfolio | LinkedIn | GitHub

SUMMARY

Junior Software Engineer with experience building full-stack and mobile applications using C#, ASP.NET Core, React, React Native, and PostgreSQL. Built and deployed applications featuring REST APIs, JWT authentication, role-based authorization, relational databases, and responsive interfaces.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C#, Java, Python, C++

Frontend & Mobile: React, Next.js, React Native, HTML5, CSS3, Tailwind CSS, NativeWind

Backend: ASP.NET Core Web API, REST APIs, JWT Authentication, Role-Based Access Control

Databases & Cloud: PostgreSQL, MySQL, Supabase, Firebase Firestore, Firebase Authentication, Firebase Hosting, SQL Server

Tools & AI: Git, GitHub, Postman, Jira, VS Code, Expo, Cloudflare, n8n

Academic Exposure: Flutter, Java Desktop Applications, C# Windows Forms

EXPERIENCE

Software Development Intern

Violet Pro | Tyre, Lebanon | September 2026 - November 2026

- Built a personal training (PT) system and the Flexible Portfolio platform (see Projects).
- Researched a virtual try-on feature for an e-commerce website and rebuilt the Hillside portfolio using a modern framework.

Freelance Frontend Developer

Shawarma Story | Lebanon | January 2026 - July 2026

- Built a bilingual (EN/AR, RTL) React/Vite QR menu with 2 interfaces and 23 reusable components for a real restaurant business.
- Implemented a persistent cart with quantity controls, totals, customer notes, and itemized WhatsApp checkout messages.
- Developed a protected Firebase admin panel with 7 menu-management operations, backed by Firestore, Firebase Auth, and authenticated write rules.

Frontend Developer Intern

TechTalks Community | Remote | November 2025 - December 2025

- Completed React-based tasks using Git, GitHub, REST APIs, databases, and Jira, practicing full-stack workflows and Git-based version control.

PROJECTS

Findly - Smart Lost & Found Platform

Final Year Project | ASP.NET Core, React, React Native, PostgreSQL, Supabase, JWT, n8n

- Built 3 integrated applications: an ASP.NET Core API, React admin dashboard, and Expo React Native mobile app.
- Implemented 64 REST endpoints across 13 controllers, secured with JWT, BCrypt hashing, and role-based authorization for 3 user roles.
- Designed 9 PostgreSQL entities with EF Core, including unique indexes, duplicate-match prevention, and 13 migrations.
- Developed 11 admin pages and 17 mobile screens; integrated secured n8n webhooks to match up to 20 filtered reports using ±7-day date rules.

Flexible Portfolio - Configurable Company Website with Admin Dashboard

Violet Pro Internship Project | ASP.NET Core 10, Next.js 16, React 19, TypeScript, MySQL, Tailwind CSS

- Built a configurable company-website CMS with an admin dashboard for 15 section types and 12 themes, with live desktop, tablet, and mobile previews.
- Built the ASP.NET Core 10 / EF Core / MySQL API with validation, cookie authentication, role-based authorization, CSRF protection, and rate limiting.
- Implemented optimistic concurrency so stale admin saves return HTTP 409 Conflict instead of overwriting newer edits.

EDUCATION

Bachelor of Computer Science

Islamic University of Lebanon | Graduated: July 2026

CERTIFICATIONS

Software Development Internship - Certificate of Completion

Violet Pro | November 2026

TechTalks Internship Program - Certificate of Completion

TechTalks Community | December 2025 | Credential ID: TT-INT-2025-089 | Verify

COMPETITIONS

Semicolon CTF Cybersecurity Competition

- Completed cybersecurity challenges involving technical troubleshooting and security concepts in a competitive CTF environment.

LANGUAGES

Arabic: Native | English: Upper-Intermediate
