SAMI FARHAT

Junior Software Engineer | Full-Stack & Mobile Development
Beirut, Lebanon | +961 71 500 323 | Email | Portfolio | LinkedIn | GitHub

SUMMARY

Full-Stack and Mobile Developer with hands-on experience building and deploying web and mobile applications using React, React Native, ASP.NET Core, PostgreSQL, Firebase, and REST APIs. Experienced in authentication, role-based access control, database integration, responsive interfaces, and AI-assisted automation workflows.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C#, Java, Python, C++
Frontend & Mobile: React, React Native, HTML5, CSS3, Tailwind CSS, NativeWind
Backend: ASP.NET Core Web API, REST APIs, JWT Authentication, Role-Based Access Control
Databases & Cloud: PostgreSQL, Supabase, Firebase Firestore, Firebase Authentication, Firebase Hosting, SQL Server
Tools & AI: Git, GitHub, Postman, Jira, VS Code, Expo, Cloudflare, n8n
Academic Exposure: Flutter, Java Desktop Applications, C# Windows Forms

EXPERIENCE

Freelance Frontend Developer

Shawarma Story | Lebanon | January 2026 - July 2026

- Built a bilingual React/Vite QR menu with 2 interfaces, 2 routes, and Arabic RTL support for a real restaurant business.
- Implemented a persistent cart with quantity controls, item removal, totals, customer notes, and itemized WhatsApp checkout messages.
- Developed a protected Firebase admin panel with 7 menu-management operations for items, categories, pricing, ordering, and availability.
- Integrated Firestore, Firebase Authentication, and Firebase Hosting using 2 verified collections and authenticated write rules.
- Created 23 reusable React components supporting responsive public-menu, mobile-cart, filtering, and admin workflows.

Frontend Developer Intern

TechTalks Community | Remote | November 2025 - December 2025

- Completed React-based development tasks using Git, GitHub, REST APIs, databases, Jira, and modern web development workflows.
- Applied internship training to academic, freelance, and full-stack projects involving React, API integration, and database concepts.

PROJECTS

Findly - Smart Lost & Found Platform

Final Year Project | ASP.NET Core, React, React Native, PostgreSQL, Supabase, JWT, n8n

- Built 3 integrated applications: an ASP.NET Core API, React admin dashboard, and Expo React Native mobile application.
- Implemented 64 REST API endpoints across 13 controllers, secured with JWT authentication, BCrypt password hashing, and role-based authorization for 3 user roles.
- Designed 9 PostgreSQL entities using EF Core, with relationship constraints, unique indexes, duplicate-match prevention, and 13 database migrations.
- Developed 11 admin pages and 17 mobile screens covering student verification, report management, matching, notifications, chat, and profile workflows.
- Integrated secured n8n webhook endpoints to match up to 20 filtered reports using university, category, item type, status, student, and ±7-day date rules.

EDUCATION

Bachelor of Computer Science
Islamic University of Lebanon | Graduated: July 2026

CERTIFICATIONS

TechTalks Internship Program - Certificate of Completion
TechTalks Community | December 2025 | Credential ID: TT-INT-2025-089 | Verify

COMPETITIONS

Semicolon CTF Cybersecurity Competition

- Applied analytical thinking and troubleshooting in a challenge-based cybersecurity competition focused on technical problem-solving and security concepts.

LANGUAGES

Arabic: Native | English: Upper-Intermediate
